PIPE COVERS OSECO PROTECTIVE

Oseco's protective pipe covers shield and save.

Oseco's protective pipe covers save you money by helping to reduce the amount of water from rain and snow that accumulates in the outlet of a service relief valve on top of a rupture disk. In addition, it keeps birds and insects from carrying debris into the outlet of an SRV. The cover will blow off to indicate that the valve has relieved or the disk has ruptured. To retain the cover near the valve location, a tether rope attachment is supplied.

Specifications for Oseco's protective pipe covers:

- Sizes 1" to 40"
- Angle or straight cut
- Weather- and chemical-resistant materials
- Easy installation

Covers are constructed of heavy-duty vinyl or Neoprene-coated polyester, with drawstring and grommet to prevent loss when valve relieves. Easy to install, covers fit over straight-cut or angle discharge piping. Please specify whether straight- or angle-cut covers are desired.
