instrument

Bilge Water Level Switch

benefits

Compact all stainless steel design

DNV & ABS Type approved models

Manual check lever

Submersible IP68 Construction

Slosh & debris protection

Simple 2 bolt fixing

A compact but rugged bilge water alarm switch for Marine use on vessels of all sizes. The integral manual checking device conforms to class rules without complicating installation. Siting and mounting is simple requiring only a two bolt fixing and the fully shrouded design prevents interference of operation from obstructions or floating debris.

standard specifications

Type BLG 150 - Standard model

Material: type:	316 stainless steel : stem, float, test mechanism and body plates.
Cable:	Slosh shield clear polycarbonate.
Max. Temperature:	2 metres of XLPE sheathed 3 -core with polyolefin boot.
Max. Pressure:	120C
Switch:	12 bar
Max rating:	S.P.C.O. reed form c
Max. voltage:	100watt AC/DC resistive load.
Float s.g:	220v
	0.62

Type BLG250 - DNV / ABS Approved models

	Type BLG250/100SS - DNV	Type BLG250/25SS -ABS
Certificate No:	A -7362	00 NO 30314-X
Material:	type 316 stainless steel : stem, float, test mechanism, body plates and slosh shield	
Cable:	2 metres of heavy duty XLPE sheathed 18-3 -core rated 600 v to US spec DAC1048C	
Max. Temperature:	125C	
Max. Pressure:	12 bar	
Switch:	S.P.C.O. reed form c	
Max rating:	3 Amps ac/dc	3 Amps ac/dc
Max. voltage:	500V ac/dc	120V ac/dc
Float s.g:	0.62	
Maximum wattage:	100W	25W

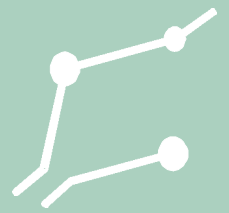

ABS Cert. No:
00-NO30314-X

DNV Cert. No:
A 7362
